

Welcome to the Free2View TV Project!

A curated list and online guide of official live TV channels streaming for free over the internet!

FREE and PUBLIC Streaming TV! Available with NO SUBSCRIPTION NEEDED! You don't need cable TV, antennas are optional with many new over-the-air channels streaming online!

The list provided on this page offers some great resources to fantastic channels that you can stream online for free RIGHT NOW! No hacks or bootlegs, we've even managed to curate a large selection of live streams, all from legal online sources, into one convenient resource!

One last thing before you check out this extensive guide to the best FREE and LEGAL live TV channels streaming over the internet... I stay up late on many nights just to make sure that everyone has the right to enjoy FREE TV without the need of paying the high costs of cable TV. I love doing this, but it is not my full time job, I do all of this in my spare time. I want to keep the content flowing and keep it relevant and updated often. Most of all, I want to make sure that everyone is not without great entertainment the way you want it-- FREE and LEGAL! If you can spare a bit of change for a cup of coffee or two on those late nights, it really helps a lot to keep the fun going and content flowing! I really appreciate your support, THANK YOU!

Click the banner below to Buy Me A Coffee!!

Note: FOR EDUCATIONAL PURPOSES ONLY. The Free2View TV Project is a non-profit, hobby based project, who does its best to source these feeds from publicly available, official sources over the internet. A curated playlist is provided as a convenience to viewers who wish to have one source to meet all their online viewing needs and is not intended for commercial distribution or exhibition, nor to replace any official means of distribution such as online apps, websites and other streaming platforms. A curated playlist is also provided as a convenience when access to the official online distribution channels (website, apps, etc.) for these services are not available for the devices on which you wish to view their programming. Copyright infringement of live streams that are publicly available online is not intended and will be promptly removed from this page or our curated playlists upon request or DMCA concerns. Please contact us by email immediately for any DMCA concerns.

The Free2View TV Project Streaming TV Playlist – Summer 2022

The Free2View TV Project uses m3u playlist files and xml EPG files added to streaming apps such as Perfect Player, TiviMate Premium, and others.

Playlists and Files

Here is where you can find our files:

PLAYLIST:

Remote link (add this link to the Playlist URL or Path settings in your media player app):

https://cutt.ly/F2V_Master

This is the short version of our master list located at our Github repository here:

<https://raw.githubusercontent.com/Sphinxroot/Free2ViewTV/main/Free2ViewTV-2021-Master.m3u>

ALTERNATE LISTS:

PC Users of the Free2View TV Streaming Playlist, use this version:

https://cutt.ly/F2V_Master_PC

Original Github RAW link:

<https://raw.githubusercontent.com/Sphinxroot/Free2ViewTV/main/Free2ViewTV-2021-Master-PC.m3u>

This version eliminates any notes that would interfere with some PC software. It's a good version to use if your streaming app has difficulty using the Master version of the playlist.

If anyone is interested in some NSFW premium videos and 18+ channels, use the link below:

https://cutt.ly/F2V_NSFW

Original Github RAW link:

<https://raw.githubusercontent.com/Sphinxroot/Free2ViewTV/main/Free2ViewTV-2021-Master-NSFW.m3u>

Use this NSFW version if you are using a PC streaming app... there are no notes in this document and will work better with the app:

https://cutt.ly/F2V_NSFW_PC

Original Github RAW link:

<https://raw.githubusercontent.com/Sphinxroot/Free2ViewTV/main/Free2ViewTV-2021-Master-PC-NSFW.m3u>

Download the complete Change Log here (.txt file):

<https://raw.githubusercontent.com/geonsey/Free2ViewTV/master/Free2ViewTV-2020-Changelog.txt>

ELECTRONIC PROGRAM GUIDE (EPG):

EPG sources updated as of May 7 2022:

(Note: No new sources have been added, just cleaned up the information for clarity. If you had these sources back upon the last update in March, you already have these!)

[01]	SAMSUNG TV PLUS **	https://i.mjh.nz/SamsungTVPlus/all.xml
[02]	PLUTO TV **	https://i.mjh.nz/PlutoTV/all.xml
[03]	STIRR TV **	https://i.mjh.nz/Stirr/all.xml
[04]	PLEX TV **	https://i.mjh.nz/Plex/all.xml
[05]	SEVERAL CATEGORIES ***	https://cutt.ly/DSr95Combinedepg

STREAMING APPS:

ATTENTION: As of December 2021, the original developer of **Perfect Player** has halted active development of the app and has removed Perfect Player from app stores. Since Perfect Player is the preferred app for The Free2View TV Project's curated lists, the app will be available through our own distribution services.

In order to install APK files on your Android device, your device must be set to Developer Mode, which will allow you to 'sideload' apps (install apps) that don't come from the official app store, such as Perfect Player on this blog. Don't let this scare you. It is a setting that is very easy to change, still keeps your Android TV device relatively secure, and being in Developer Mode won't really affect your day-to-day operation of your device at all. In fact, after you've sideloaded the apps you want, you can simply turn developer options off if it makes you feel more comfortable.

Do the following: Go to your Chromecast settings > about > Android TV OS build and click the center button on your remote while you have the build number highlighted. After a handful of clicks, you'll see a countdown and then a message that says "You are now a developer!" That's it!

Next, allow installation from unknown sources: Stay in the settings menu and head to the Apps > Security & Restrictions > Unknown sources and flip the switch that will allow your device to install apps from unknown sources. Again, you can turn all of this off at the end of this whole process (after you have what you want installed) if this makes you feel unsecured.

Now, click [here](#) to get Perfect Player APK from our Github repository and download it to your computer.

Once all of this is done, now you will need to install a file explorer app on your device that will allow you to download Perfect Player (or any APK file from any sources). I prefer an app that is available through the Google Play Store called X-Plore File Manager. The reason why I prefer this app is because you can link your Google Drive account and download files from your GDrive directly to your Google TV device. So, from this blog, download the APK file for Perfect Player to your PC, then upload the file to a folder in your Google Drive (all Google gmail accounts come with Google Drive, so get a gmail account if you don't already, it's free and comes

with 15GB of cloud storage space). On your Google TV device, open X-Plore File Manager and navigate to WebStorage (on the right pane), then to your Google Drive folder that has the uploaded APK file. Click on the APK file and your device will start downloading the file. Accept all the prompts to install the APK and that's it!

Now that you have Perfect Player installed, continue below!

PERFECT PLAYER:

EASY SETUP USING PERFECT PLAYER: Here is a very easy way to get **Free2View TV** on any Android / Android TV device using the **Perfect Player** app:

The first thing you will do is download the file below to a USB stick if your device supports USB, or you can use a cloud storage app such as one described in the previous section of this document (this is a backup file for Perfect Player that is already pre-configured with the initial settings and remote URL's for Free2View TV and its EPG sources).

Click the link to download the file and save it to a USB stick (or directly to the Downloads folder of your device, or directly to a cloud folder that you will access from your file explorer app on your device):

Backup 12/12/21 (Master list)

https://od.lk/s/MF8yNTU3OTcyNDBf/20211212_F2V-Master.ppbck

Backup 12/12/21 (Master NSFW list)

https://od.lk/s/MF8yNTU3OTcyNDRf/20211212_NSWF.ppbck

Perfect Player APK apps and backup files are also available to download from our Github mirror:

<https://github.com/Sphinxroot/Free2ViewTV/tree/main/PLAYER>

1. Go to the Android Store on your compatible streaming device, search and install Perfect Player.*
2. Once you launch Perfect Player, you will be met with a playback menu in which you will see the Settings icon (the gear wheel at the furthest right of the menu.)
3. Click on the Settings gear wheel icon, then click Defaults.
4. Click on Restore Settings and navigate to your USB stick (or the Downloads folder) from your device and select the '[current].ppbck' file.
5. Perfect Player will load the backup file, close down, then relaunch with the new settings.

** Download Perfect Player apk standalone app if you cannot get it through your Android app store:*

August 2021: Get the latest version of Perfect Player as it fixes issues of the app crashing after a recent Fire TV update!! Get Perfect Player standalone APK from the official website:

<http://niklabs.com/news/>

Once Perfect Player relaunches, the basic setup of **Free2View TV** will be complete and you can customize your experience as you wish (set up Favorites, tweak other playback settings, etc.). You can then create your own backup (via Backup Settings option in Perfect Player) just in case something goes wrong later on and you need to restore your last backup.

FireTV (FireStick) owners: Here is a guide on how to install **Perfect Player** on your devices. You can also use cloud storage services / app to download PP backup files to your device, or manually type all the sources into Perfect Player's settings once the app is installed.
